INTRODUCTION

Internships are a process of gaining skills and experience that are beneficial to your career Helps students have knowledge and understanding of actual work Both in the establishment and Self-employed Students also have the opportunity to use new tools. In private business circles and government equipment As well as being aware of the operating procedures and working techniques of the agency where you train. Applying the academic knowledge learned

to work until being able to see creative methods and techniques in work. Looking at the goals of the organization's success as well as efficient production Working with others Having human relations at work In addition, it also builds confidence and a good attitude towards the profession. and also allows intern students to learn Working happily with others Importantly, it is to enhance competency in occupations in the future. Therefore, internships with learning from real experiences are part of skills training. of students that are very useful to students and currently, agencies related to education The importance of learning from real experiences in the student profession is given. Has provided a process Practice learning skills from real experiences of students in educational institutions. By coordinating education with business establishments Curriculum and professional experience courses have been established.

Learning from real experiences through internships is therefore an education system that emphasizes work in the workplace. By arranging for students to perform actual work at the establishment. This system will result in students being given the opportunity to learn and experience from working and working with others. Develop communication skills with others. which is a desirable characteristic of an establishment At the same time, the establishment has workers who have a certain level of skills and readiness to help with the work. which may receive new ideas from interns. It is also a way to lighten the burden so regular employees can go to work that is more difficult. As for educational institutions, the results of this system will be used to improve various curricula to be more appropriate and consistent with the needs of the labor market. Teachers gain new and cutting-edge experience, resulting in continuous academic collaboration between the establishment and the college. By way of internship, students will focus on cooperation from all parties involved. in order to achieve maximum mutual benefit.

Faculty of Fine and Applied Arts Realized the importance of student quality. In order for students to complete their studies complete with academics, knowledge, and desirable characteristics. Able to work effectively with business establishments and is in demand in the labor market. Therefore, students are sent out to gain professional experience. It is an integration of knowledge learned along with working in actual establishments. Because even though there will be practical lessons during study. But it will be different from working in a real establishment, allowing students to try working and actually learn. Get prepared before working in real life. As a result, students get jobs before graduating, as well as giving students work experience before they graduate. This will benefit students in terms of confidence as they will already be familiar with the work being done. Have you tried working in a real business establishment before Under the regulations of that establishment Like a real employee in every respect But in this professional training experience Students need to choose the establishment where they will work. Students will be prepared and eager to find the best for themselves. The Faculty has a process for submitting documents but it still does not meet the needs of students.

In this regard, the researcher is interested in developing the professional experience training process. Faculty of Fine and Applied Arts Suan Sunandha Rajabhat University. because he saw that students of the Faculty of Fine and Applied Arts. There are various needs among students when choosing to submit documents. Therefore, the researcher used the results to develop Improve student preparation even further.

OBJECTIVE

1. To study factors affecting the submission of documents in professional experience training. Faculty of Fine and Applied Arts Suan Sunandha Rajabhat University
2. To study the development of the professional experience training process. Faculty of Fine and Applied Arts Suan Sunandha Rajabhat University

RESEARCH METHODOLOGY

Population and sampling

Population

The population used in this research is Fourth year students from all 6 majors, Faculty of Fine and Applied Arts Suan Sunandha Rajabhat University

Tools used in research and determining the quality of tool

The tools used in this research include

1. Survey Studies created by the researcher. The concepts obtained from document analysis were compiled related.

2. In-depth Interview, open-ended questions. that the researcher created from the results of a survey regarding examination operations and put it into an open-ended interview format. To gain factors in deciding on the choice of establishment for students' professional training experiences. Faculty of Fine and Applied Arts Suan Sunandha Rajabhat University

Data collection

The researcher collected data in the following order:

1. The researcher studies from concept documents. Theory and related research to provide a framework for Conduct research and create surveys and interviews appropriate to the content and scope of the study.

2. The researcher took the survey and interview form to experts to check and revise accordingly. Recommendations from experts to be consistent with the objectives

3. The researcher prepared a complete survey and interview form for further data collection.

4. The researcher collects data by sending surveys to academic personnel. Faculty of Fine and Applied Arts and collected and analyzed to find frequencies and percentages.

5. Take the data from the survey and conduct interviews to analyze to find good practices in developing the process for organizing examinations for selecting individuals to study at the Faculty of Fine and Applied Arts. Suan Sunandha Rajabhat University

6. Prepare a process flowchart for the study of guidelines for creating professional experience training projects. Bachelor's degree Faculty of Fine and Applied Arts Suan Sunandha Rajabhat University

7. Bring the process flowchart to experts to assess suitability and feasibility apply.

8. Create factors for deciding on the choice of establishment for students' professional training experiences. Faculty of Fine and Applied Arts Suan Sunandha Rajabhat University to present to administrators and use in their work to benefit

Data analysis

Data analysis The researcher will analyze the data using the following methods.

1. Survey: The researcher verifies all returned questionnaires for accuracy and completeness. Data were analyzed using the following statistics.

1.1 Analysis of general status data of respondents using frequency and percentage distribution.

1.2 Analysis of research status, frequency distribution and percentage

2. Interview form: The researcher takes the information obtained from the interview to check for accuracy and analyzed the content Using a content analysis table to summarize the interviews and present them in an essay and create a practice guideline Then have experts evaluate the suitability of the process for use in further work.

RESULTS

From the study of the development of the professional experience training process Faculty of Fine and Applied Arts Suan Sunandha Rajabhat University The results of the research are summarized as follows.

Part 1 Results of analysis of personal information of 4th grade students, Faculty of Fine and Applied Arts. Suan Sunandha Rajabhat University, 50 samples, classified according to general information as follows: 1. Personal information of the respondents found that the majority were female (64.00 percent). 2. The sample group that responded to the questionnaire found that the majority were music major students (24.00 percent). 3. Most want to choose to gain professional experience at a private company (Company...Limited, Company...Public Limited) the most (75.50 percent) followed by government/state enterprises (20.70 percent)

Part 2 Survey and in-depth interview (Indepth Interview) The interview informants include supervisors. and students practicing professional experience Faculty of Fine and Applied Arts Suan Sunandha Rajabhat University Quantity: 50 samples It can summarize the study of factors in deciding to choose a business establishment. Practice experience Student's profession Faculty of Fine and Applied Arts Suan Sunandha Rajabhat University as follows.

Development of the professional experience training process The results of the survey found that Overall average for the development of the Faculty of Fine Arts professional experience training process. Suan Sunandha Rajabhat University All 5 levels of opinions accounted for 4.27 points, consisting of 1) The highest had an average score of 4.49 points. 2) Very, with an average score of 4.39 points. 3) Moderate, with an average score of 4.19 points. 4) Little has an average score of 4.18 points. 5) least, with an average score of 4.11 points.

Development of the professional experience training process Faculty of Fine and Applied Arts Suan Sunandha Rajabhat University By using information systems to collect, process and manage data efficiently as well as searching for information and developing operational processes To be in line with the policy of Suan Sunandha Rajabhat University In terms of saving resources and using technology To enter the digital university consistent with the concept of Phusit Phukhamchanod, (2 0 2 3) Design Thinking Based on the Urban CommunityCapital for Sustainable Right Livelihood Development.then it could be defined that the general lifestyle of urban people comprising early wake up; reach home late; volunteers for community development by the women and single moms; unemployed people; retired and being a housewife, the intention of generating income led to the brainstorming in the knowledge of the right livelihood development from teaching management, and integrating with the research for local areas and academic services for society as the Rajabhat strategy to improve the life quality of grassroots economy. It also created the prototype of “Thai Dessert with Banana Leaf” and “Young Tamarind Chilli Paste” for the pilot test in Sawaswareesrimaram Community; and create the logo as adding value by the storytelling and lesson learned in the right livelihood process of sustainable development.

ACKNOWLEDGMENTS

I would like to thank the university administrators, faculty administrators, and teachers of the Faculty of Fine and Applied Arts and research and development institutes Suan Sunandha Rajabhat University In kindly providing information, advice, suggestions and ideas that are useful in conducting this research.
